

VORTEX SUCCESS STORY

BATTLE CREEK TRANSIT

Battle Creek, Michigan

38.6% Increase in MPG

Vehicle – A 2007, ten passenger, 20-foot cutaway van, manufactured by Diamond Corporation. The van has a diesel engine on a Ford chassis. The starting mileage for the demonstration was approximately 13,000 miles.

Battle Creek Transit (www.BattleCreekTransit.com), a municipally owned transit company providing public transit services to Battle Creek area residents. The successful demonstration was conducted over a period of approximately six months and resulted in Vortex Diesel Savers being installed on the entire fleet of cutaway vans.

The testing was performed by employees of Battle Creek Transit. See the testimonial letter written by Jerry Hutchison, Transit Manager, on the reverse side.

Subject: Fw: Fuel Saver status

Bruce-

Just wanted you to know that we concluded some additional tracking of fuel usage on van #156 in order to verify our earlier mpg results. Our initial testing indicated a mpg of approximately 8.87 with the fuel saver installed, compared to 6.65 mpg without it. Our latest results indicated a mpg of 9.22 mpg. Based upon this, I would be interested in moving forward on equipping the remaining 8 vans in our fleet. Please get with me at your earliest convenience to discuss our options for doing this. Thanks, Bruce.

Jerry
