Dear Bob,

March 6, 2006

I want to thank you for introducing me to the Vortex Fuel Savings System, as you are aware I was very skeptical about the use of the magnets as a fuel savings device, and boy was I wrong.

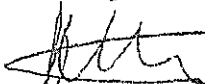

The fuel saving system on my 2003 S-10 pick up has increased my mileage from 350 miles distance to empty to 425 miles distance to empty.

As you are aware I am a graduate of NASCAR, and hold a degree in electronics as an electronic technician. In addition, on my 1996 Chevrolet Suburban 6.5 diesel I have achieved 28 miles per gallon. This is an increase of 10 miles per gallon.

I am employed at a major car dealership as a technician. The dealership that employs me is now carrying the magnets and the results overall has been nothing short of spectacular.

In every case where the system has been installed there has been a reduction in emissions, and an increase in mileage.

Thank you for your product.

Keith Rotzi
