Re: Heavy Duty Diesel Vortex Fuel Saver

Dear Steve:

This letter confirms that LaMonica Fine Foods recently completed a three-month test of your Heavy Duty Fuel Saver system on our truck fleet.

As you know, we had four Freightliners with C-15 engines leased by Miller Leasing Company. Two of the trucks were 2007 models with approximately 50,000 miles and the other two were also 2007 models but with approximately 110,000 miles. Our trucks normally run between 3,500 and 5,000 miles per month. Prior to installation, our fleet average was 5.2 MPG and after a full 2 months of testing, the MPG average of our fleet increased to 6.2 MPG which is a 19% increase in MPG.

We were extremely satisfied with the results of your product, which led, of course, to our purchasing the product for our entire fleet. We at LaMonica Fine Foods would recommend your Heavy Duty Diesel Vortex Fuel Saver systems to any trucking company interested in reducing fuel costs and increasing their bottom line.

Very truly yours,

Dennis McStravock
Senior Buyer
